SPEC.md (132 lines) — what we're building and why CONVENTIONS.md (129 lines) — how we name and structure things

Mood

Fast. Bold. Tactile.

Numbers animate from old to new when you change them — like WhatsApp opening a chat, no flicker, no reload. The $ amount is the hero on every screen, the way it is on Nequi when you send money. Surfaces sit on a deep black with a soft magenta glow, warm like Nu, never clinical.

One primary action per screen. Secondary actions reveal on demand. Every tap is a tap you meant, never a navigation.
